Ankit Kumar Singh

Passionate and detail-oriented MERN Stack Developer with strong skills in HTML, CSS, JavaScript, and ReactJS. Seeking to leverage my front-end development skills in a dynamic internship environment where I can contribute to client projects and grow under senior employees' guidance.

Project Experience

Hackathon Project: Toy and Games Website

- Developed a fully responsive website for a hackathon, focusing on interactive features for users.
- Built with the MERN stack (MongoDB, Express, React, and Node.js) to create an engaging UI and smooth UX, **securing third place.**

Math Adventure Game

- Developed a fully responsive website for a hackathon, focusing on interactive features for users. Built with the MERN stack (MongoDB, Express, React, and Node.js) to create an engaging UI and smooth UX, securing third place.

Portfolio Website

- **Description**:A personal website built with the MERN stack (MongoDB, Express, React, Node.js) to showcase my skills, experience, and projects.
- **Why**:Demonstrated full-stack development, focusing on responsive design and dynamic content for a seamless user experience.
- **Skills Highlighted:**MongoDB, Express, ReactJS, Node.js, Full-Stack Development, Responsive Design

Achievements

3rd Place – Hackathon Competition (November 5, 2024): Successfully led my team in creating a unique project for the theme of toys and games.
